the engine. ^ Some no-crank or crank-no-start situations can occur in a workshop environment by a combination of key cycles. This means that it is not advisable to repeatedly crank and start engine to test the system. The Immo verification is only done once per key cycle and it will not add any value to stress ignition switch on and off.

The Most Common P2 Volvo from inside the engine bay with the strut still installed. The nut and washer can be seen in the diagram to the left and are numbered 1 and 2. Once these are removed you'll see the "T nut" and will be able to better gauge the condition of the seat.
