Operations management, as we know it today, is an organisational function: it only exists and has meaning when considered in the context of the function that it serves within a firm or an institution. Thus, in order to propose a theory of operations management we first need to ask

operations, as well as to the traditionalist mind set that fosters such lapses, the following pages provide a brief overview of the US military's involvement in such operations and draws out the salient patterns and recurring themes that can be derived from those experiences. It is hoped that a pre-

Below is the Level of Emergency and Decision Matrix to guide the implementation of the COOP plan (this should be modified to fit the department). For additional information regarding

6 OPERATIONS RESEARCH Using the simplex method By introducing the idea of slack variables (unused resources) to the tables and chairs problem, we can add two more variables to the problem. With four variables, we can't solve the LP problem

Lecture2 MatrixOperations • transpose, sum & difference, scalar multiplication Matrix Operations 2–2. Matrix addition & subtraction if A and B are both  $m \times n$ , we form  $A+B$  by adding corresponding entries Examples example 1:  $1\ 6\ 9\ 3\ 0\ -1\ -1\ 2 = -6\ 11\ -3\ -3$  for example, to get 1,1 entry of product:
